

**AMENDMENTS TO THE SPECIFICATION**

Please amend paragraph [58] of the Specification as follows:

[58] Wireless transmission or communication between the access devices or clients, and the access points may be secure. This may [[be]] also be true for the wired connections between any of the access points 310, 312, 314, 316, 318, 320 and the switches 306, 308. The switches 306, 308 and access points 310, 312, 314, 316, 318, 320 may be adapted to communicate using, for example, an Ethernet protocol. From the switch's perspective, the switch may be switching regular layer 2 frames. However, within the switch, knowledge of a WLAN and its management intelligence may reside primarily in software. Notwithstanding, the invention is not limited in this regard.

Please amend paragraph [67] of the Specification as follows:

[67] United States Patent Application Serial No. 10/607,094 entitled "Communication System and Method in a Hybrid Wired/Wireless Local Area Network" filed on June 26, 2003, discloses a messaging protocol that may be utilized by the switch in accordance with an embodiment of the invention, and is incorporated herein by reference in its entirety. Exemplary valid fields and subfields for various messaging protocol messages that may be utilized by the switch in accordance with an aspect of the invention are disclosed therein.

Application No. 10/658,734  
Reply to Office Action of December 14, 2006

Additionally, United States Patent Application Serial No. [[\_\_\_\_\_]10/658,140  
(~~Attorney Docket No. 14178US02~~) entitled "Method and System for Providing an  
Intelligent Switch in a Hybrid Wired/Wireless Local Area Network" filed on  
September 9, 2003, discloses a messaging protocol that may be utilized by the  
switch in accordance with an embodiment of the invention, and is incorporated  
herein by reference in its entirety. The switch disclosed therein may be adapted to  
utilize the messaging protocol to provide network management in accordance with  
an embodiment of the invention.
